Work Experience

Front End Developer
NL Eats | November 2020 - April 2021 (contract)

- Worked with multiple teams balancing multiple projects at one time
- Built new components for a multifunctional React.js application (FOMTree) and maintained codebase
- Designed the UI for the company project (FOMTree) using Chakra UI and React.js
- Brought the NL Eats site design from concept to reality, focusing on accessibility and branding using WordPress

Intern
CertClean | Spring 2017

- Updated and maintained website content for multiple Wix sites
- Maintained line of communication with brands and influencers on promotions and weekly updates
- Proposed and launched several customer outreach programs increasing brand awareness
- Managed brand image across all social media platforms

Server/Expo
The Erin Mills Pump and Patio | September 2014 - March 2019

- Monitored 200 - 500 seat restaurant, ensuring communication between servers, kitchen and managers

Projects

Tarot Universe
React.js | JSX | HTML | CSS

Tarot Universe is a fortune-telling app that pulls data from a tarot database. The tarot layout reflects on the past, present and future. This application invokes an immersive head-space through user interaction and CSS animation.

Post It!
React.js | JSX | Firebase | HTML | CSS

Post It is a Post-it themed React.js app for writing and saving notes. The user can pick the colour and text size of the message. While demonstrating data manipulation, Post It focuses on being simple, bright, and fun.

Recipease
jQuery | CSS3 | ES6 | HTML

Recipease is a meal planning app. Taking user input and generating a custom meal plan, Recipease displays pictures and links to recipes. Using the Spoonacular API.
